league. The resolution follows:

HER UNDERBODY IN VERY GOOD CONDITION.

To Be Thoroughly Overhauled and Launched on Next Thursday—Columbia to Be Manied Out—Committees to Meet Tomy and Settle Postponement of Races.

The Shamrock II. was towed over to the Erin Basin early yesterday morning and shortly after 9 o'clock was floated into dry dock. It took some time to get the yacht properly over the blige blocks, which were brought from Denny's yard at Dumbarton, and great care was taken to get her exactly in position before the water

experiments, but simply to burnish the metal

The sailmakers are busy with the sails and although they seemed to set perfectly when the yacht was sailing last week they did not satisfy Thomas. Easts weak in many slight changes are being made that will make their fit perfect.

There were many visitors at the dry dock during the day and the hull of the yacht was highly praised. It was not generally known that the vacht was to be nauled out in the morning or there would have been many more in the yard and the gateman had been told to allow only those who had business in to see the yacht. The Erin is still at anchor off Tompkinsville. Her flags flew at half mast all day long and Sir Thomas Lipton, who was on board, received many visits from friends. The Frin will go over to the basin this morning so that all who are interested in the Shamrock may be on hand and watch what is being done.

Mr and Mrs William G. Jameson have

being done.

Mr and Mrs William G. Jameson have gone to Buffalo and Niagara Falls for a short visit. They will not be back until the end of the week. Col. Sharman Crawford is out of town, but will be back some

The Columbia, the defender of the Cup. arrived yesterday afternoon in tow, and her tender, the Park (ity, followed. The defender will be hauled out on the balance dock of the Morse Iron Works this morning and be thoroughly channed. She will be and be thoroughly cleaned. She will be on the dock until Thursday, and then both yachts will be measured by John Hyslop, the official measurer of the New York Yacht Club.

on the dock until Thursday, and then both yachts will be measured by John Hyslop. The official measurer of the New York Yacht Club.

When the Shamrock II, began her trigls in those waters she floated on a water line very nearly 90 feet long. Since then many changes have been made in her trin, and it looked yesterday as though her waterline length is much shorter than it was when she left the dry dock a month ago. If the line has been shortened her racing length will not be as long at it was expected in spite of the enormous sail spread she, and she will not have to allow the Columbia as much as was first estimated. However much she has shortened her line, though, she will still have to make quite a large allowance to the Columbia. It has been figured from one minute to 1 minute and 60 seconds over the Cup course.

Several members of the Challenge Committee of the New York Yacht Club arrived in town yesterday, and others are expected to-day. They will meet early in the day and decide on the question of postponing the races for the America's Club. The committee of the New York Yacht Club, and there will be a conference between the two committees. There was a general feeling among members of the club yesterday that the delay whould only be a short one and there were some who said that if the date for the first race was postponed until Tuesday, Sept. 24, it was to show the respect necessary and that as the funeral of President McKingley was to be next Thursday, this day was all that should be made. One of the committee said that the members were just as anxious to get the races over as Sir Thomas Lipson was, and that every thing to arrange matters properly would be done.

With the football sea

With the football sea on close at hand, the Long Island Interscholastic League has adopted its championship schedule. Brooklyn Latin School ard Adelphi Academy, Brooklyn Latin School and Adelphi Academy, though not represented on the gridiron last season, have asked for dates. It is doubtful I Latin will get a team out, but the indications are that Adelphi will be successful President C Bishop is a member of Adelphi and is in favor of organizing an eleven, even in the face of the fact that several of the faculty frown upon the suggestion Pratt Institute has lost nearly half of its championship eleven, but the boys are putting their snoulders to the wheel and confidently declare that they will successfully defend the pennant. The schedule follows:

BASEBALL. Restorn Teams Still Lead the West Games Wen.

Games Wen.

The baseball race of 1901 is locally in its last stages. From now on the greater part of the fighting will be in the West. The mere fact that the Brooklyns practically finish their season in the West does not militate against their pennant chances, as the Champions are a strong road combination. On account of Pittsburg's lead the prospects for the Brooklyns overtaking the Pirates would be slim whether they finished at home or abroad. There is this much to say about Hanlon's men and that is they have treated their patrons to much high-class ball, given to them their money's worth fully. The pennant is the chief aim, but any team that finishes second or third plays good enough

ball for the most exacting.

The fact that the eastern teams play the

SPRINK S. AND THE MONK WAIT-ING FOR GOLD-TOOTH PACER.

Patrons of Speedway Expected to See Lots of Fun If Dr. Randell Had Brought His Horse to Time Indian Jim .

Fiver -- Billings Roadsters in Favor. While there were several interesting brushes on the Speedway yesterday morning, the sport was not really up to what a should have been considering the character of many of the horses driven. It was reported along the walk that Dr. David Randell's gold-tooth pacer. Moth Müler, was going to have an argument with E. E. Smathers's chestnut pacer Sphinx S and also that The Monk, Fred Gerken's fast trotter, was going to give the roan pacer a brush. Sphing S was there and so was The Monk, but the dusty horse from Boston failed to put in an

appearance. It was learned later that is had been shipped to Hohokus, N. J., where he is entered in the races this week. Fred Gerken, with a chip on his shoulder, drove up and down with The Mank, looking for some one game enough to give him a brush, but no one seemed willing to try conclu-

ground before he could get through, so the when he emerged from the ruck Indian Jin was rushing down to the finishing post several lengths ahead. Turning to Washingto
